

Test your solutions in a real-world environment

Do you develop solutions related to an area or a function in an airport and do you need to test your solution in a real-world environment? Then Billund Airport Innovation Hub is the perfect setting.

For startups og SME's

Billund Airport is a centre for test- and development collaborations as well as activities that contribute to an increase in innovation within the transportation and logistics industry.

Are you a startup or a SME who works with solutions that can be used in transportation and logistics e.g., handling of cargo, baggage or passengers, digitization, automation, robot technology, or behavioural design?

At Billund Airport Innovation Hub, you will have a unique opportunity to test your solutions in a real-world environment and at the same time become a part of a strong professional network.

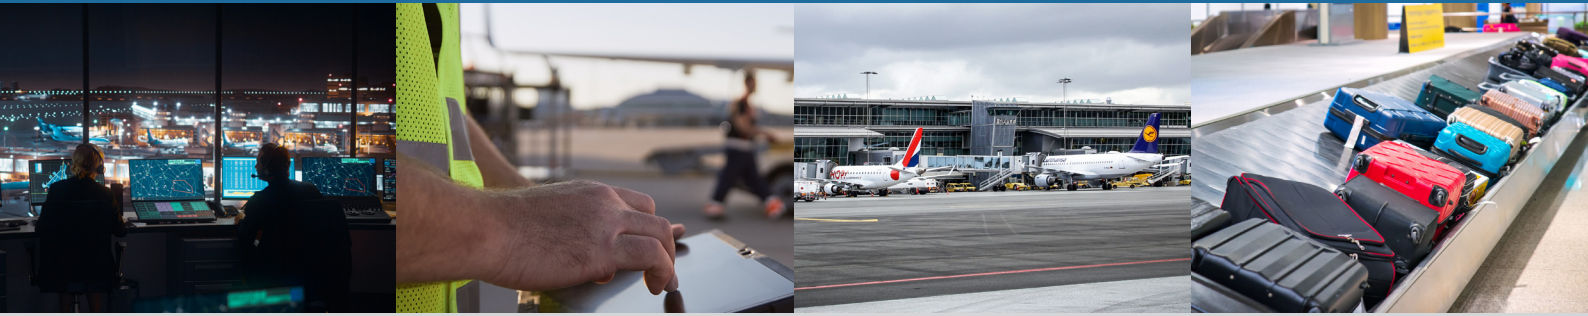

As a strong regional actor, Billund Airport is at the centre of logistics and transportation of passengers and cargo related to aviation.

Billund Airport

DigitalLead.
